

GLOBAL WIND
ORGANISATION

Are you considering a career in the exciting wind industry?

The GWO's Slinger Signaller Module is to enable the participant to support and care for themselves and others while working with slinger signalling in the wind industry by possessing the required knowledge, skills, and ability to conduct assigned tasks safely and efficiently.

Upon successful completion of GWO's Slinger Signaller Module training course, the participant will be able to work within the wind industry conducting slinging techniques and signalling during simple lifting operations, meaning lifts conducted based on a lifting plan or covering known hazards.
