WELCOME TO BLYTH

A warm welcome to Blyth where my colleagues and I will endeavour to support you with any requirements you may have.

At Port of Blyth, we pride ourselves on a level of service and attention to detail that is second to none, whilst the safety of our staff, contractors and all visitors is always our number one priority.

We look forward to working with you and supporting your business here at the Port of Blyth.

Martin Lawlor
Chief Executive

In this booklet you'll be able to find details on:

The services supplied by our departments including marine, operations and HSQE.

The services available from both our award-winning training team Port Training Services and logistics subsidiary Transped.

The huge range of services available from the mature supply chain of businesses located on site, enabling us to offer you the full-service package to keep your operations running seamlessly.

PORT SERVICES

The Port of Blyth is able to offer a comprehensive range of services, labour and equipment to visitors.

The Port of Blyth operates over 4 main ISPS secure terminals on the River Blyth with approximately 55 hectares of operational land feeding to 9 deep water berths.

Excellent access from sea is guaranteed by a tidal deep water port accessible in virtually all weather conditions. Vessels of up to 200m LOA and 35,000 DWT have direct access to open sea with no

locks and no air draft restrictions. Port disbursements are competitive with berths suitable for jack up operations.

The Port also provides a wide range of additional, value adding services to support all our customers and their partners. A comprehensive in-house lift planning service can assist handling operations provided by fully qualified Port management who work closely with the client from early planning, to project completion.

THE PORT OWNS AND MANAGES OVER 3000 PIECES OF LIFTING EQUIPMENT AND OPERATES A 24/7 STORES FACILITY, WITH FLEXIBLE WAREHOUSING AND EXTERNAL STORAGE OPTIONS AVAILABLE.

SERVICES

The Port's main asset is its workforce who have absolute focus on delivering first-class service to a growing list of valued partners and customers.

All stevedores are trained to the highest standards; all holding nationally recognised qualifications delivered by our training division, Port Training Services. Expert, flexible and safe handling services are therefore assured.

The Marine Department operates on a 24 hour, 365 day basis, providing a variety of services including pilotage, towage, fresh water supplies, waste disposal and diving services.

As the training division of the Port of Blyth, Port Training Services (PTS) was originally conceived to ensure the Port's own staff were trained with the necessary skills, qualifications and competency to deliver the Port's services both safely and effectively.

Today, PTS deliver high quality practical and vocational training ensuring delegates leave better prepared to make their working environments across the UK both safer and more productive.

EQUIPMENT

All operational terminals boast a comprehensive range of handling equipment available on flexible terms for lifting project pieces up to 600 tonnes and moving pieces greater than this by RoRo and SPMTs.

TRAINING COURSES PROVIDED INCLUDE:

LIFT TRUCKS

ACCESS EQUIPMENT

CRANES/LIFTING

EARTH MOVING MACHINERY

HEALTH & SAFETY

SUBSEA & RENEWABLES

Established in 1997, Transped offers a one-stop shop service to organisations wishing to move goods between Europe and the UK, with the company running a

weekly container line between the UK and the Netherlands alongside complementary warehousing and distribution services.

SERVICES INCLUDE:

- CONTAINER SHIPPING
- WAREHOUSING & STORAGE
- HAULAGE & DISTRIBUTION
- EXPORT PACKING
- CUSTOMS CLEARANCE
- FREIGHT FORWARDING
- PROJECT FORWARDING
